EXPERIENCE

Front-End Intern — *Remote Intern position with startup company. Conducted responsibilities with little supervision and effective communication. Developed prototype of healthcare marketplace platform MVP by working closely with UX/UI designers to convert design files into graphical interfaces utilizing HTML, CSS, JS, and React/Redux libraries, and integrated appropriate backend API endpoints. (Subject to NDA, no further details available)*

Nov 2019 - present

Client Startup Landing Pages— *Designed and developed personalized landing pages for individual clients.*

HTML, CSS, Bootstrap, jQuery, Javascript, Mailchimp

PROJECTS

Crwn Clothing — *A simple yet clean and mobile-friendly react based e-commerce app that includes navigation, routing, shopping pages, a cart, and checkout components.*

React.js, Redux, Routing, User Auth, Firebase, Stripe API

Smart Brain App — *An image recognition app that interacts with the Clarifai's Face Detection API - an api that determines the probability that an image contains human faces and then proceeds to encapsulate the faces within a styled bounding box.*

React.js, Node.js, Express, PostgreSQL, ClarifaiAPI
